

MONSANTO

**ATTENTION:
TO STUDENTS of MASTERS in AGRICULTURE
or TO STUDENTS in the LAST YEAR of AGRICULTURE FACULTY**

Monsanto is an international agricultural company with its headquarters in St Louis, Missouri, US. We develop innovative products and technologies to help farmers around the world to be successful, produce healthier foods, better animal feed while also reducing agriculture's impact on the environment. We have a full range of company activities across Europe and Africa. Our business has been operational in Romania for over 30 years with a significant growth in the last 10 years.

On Tuesday, 15 December, a presentation about research breeding will be given by Monsanto. This will give you the opportunity to discover more about corn breeding in particular & consider the possibility of joining the Company.

Do you want to have the opportunity of a future position within our Breeding team? Are you interested to apply your knowledge within an exciting Company & develop a career in a stimulating environment?

If you are in your last years of study in Agriculture, or student at Master in Plant Breeding and Seed Production, or student to another Masters in Agriculture:

- your GP (average graduation) is more than 7
- you can communicate in English
- you are motivated, proactive and you are passionate about agriculture

Please join us on December, 15. 2009, at 10:30 o'clock in the ApA Amphitheatre to attend Monsanto presentation.

Please, do not forget to bring your CV and your cover letter.

Looking forward to meeting you
